

Emergency Connectivity Fund – FCC FAQs

Issued 6.25.2021

<https://www.fcc.gov/emergency-connectivity-fund-faqs>

Eligible Entities

Q: If my school or library is eligible for E-Rate support, is it eligible for the ECF program?

A: Yes.

Q: Are private schools eligible?

A: Yes, private schools are eligible if they meet the definition of elementary or secondary schools as defined in the Elementary and Secondary Education Act (20 U.S.C. § 7801(19) and (45)), are non-profit, and do not have an endowment exceeding \$50 million.

Q: Are Tribal libraries eligible?

A: Yes. Tribal libraries are eligible for support from the ECF program. Tribal libraries may demonstrate their eligibility by providing (1) documentation from an authorizing Tribal government entity (such as a charter or ordinance or letter from the Tribal Council), (2) documentation from an authorizing entity that shows that the applicant has characteristics of a library, including regular hours, staff, and materials, or (3) a signed letter from a state library agency.

Q: Is a college library (e.g., a Tribal college library) eligible?

A: No. A library's eligibility depends on its funding as an independent entity. Only libraries whose budgets are completely separate from any schools (including, but not limited to, elementary and secondary schools, colleges, and universities) are eligible.

Q: Do I need a SAM.gov account if I am an annual E-Rate applicant?

A: Yes. SAM.gov registration is necessary for all entities that receive funds from the U.S. government. Because this is not currently required to participate in the E-Rate program, applicants that may not have registered before should begin the process now. Service providers that agree to invoice on behalf of applicants also need to be registered with SAM.gov.

Eligible Equipment and Services

Q: Will the ECF Program support installation and configuration performed by a third-party vendor that is different from the vendor that sold the equipment to the applicant?

A: No. Installation and configuration costs will only be eligible for ECF support if they are provided by the same vendor that is providing the eligible equipment.

Q: Do eligible connected devices need to be capable of connecting to a cellular service (LTE or 5G)?

A: No. While laptop computers and tablet computers must be capable of connecting to broadband internet in order to be eligible for funding as a connected device, they do not need to be capable of connecting via a cellular service. We expect the connected devices to be Wi-Fi enabled and able to support video conferencing platforms and other software necessary to ensure full participation in remote learning.

Q: Are Chromebooks and iPads eligible as connected devices?

A: Yes. Applicants may request ECF support for Chromebooks, iPads and other laptops or tablets. We expect these devices to be Wi-Fi enabled and able to support video conferencing platforms and other software necessary to ensure full participation in remote learning. Chromebooks may be requested under the laptop equipment category.

Q: Is a license to use a connected device eligible for ECF support?

A: Licenses included in the base price of the connected devices are eligible for support and do not require cost allocation, but separately priced licenses are ineligible for ECF funding.

Q: For the initial application filing window, do the eligible equipment and services need to be purchased and received after July 1, 2021?

A: Equipment and services can be ordered before July 1, 2021, but they cannot be received, delivered, or paid for before July 1, 2021. Note: There is an exception for monthly services that were prepaid prior to the adoption of the ECF Order (see below).

Q: For the initial application filing window, are monthly services that were prepaid prior to the adoption of the ECF Order eligible, such as when an applicant prepaid for a multiyear contract last year?

A: Applicants may seek reimbursement for services delivered between July 1, 2021 and June 30, 2022 that were prepaid prior to the ECF Order adoption on May 10, 2021, if they can demonstrate that the services were purchased to meet unmet student, school staff, or library patron needs. Such applicants may not seek reimbursement until after the services have been delivered. Prepaid equipment is ineligible for ECF support during the first application filing window, which is limited to equipment and services received, delivered, and paid for between July 1, 2021 and June 30, 2022.

Q: Can applicants prepay and seek support for multiyear contracts?

A: No. Applicants may only seek support for the monthly costs of services delivered between July 1, 2021 and June 30, 2022. Approved applicants may not seek reimbursement until after the services have been delivered.

Q: We bought Wi-Fi hotspots last year. Can we request ECF support for the monthly service costs?

A: Yes, monthly service costs for services delivered between July 1, 2021 and June 30, 2022 are eligible, but the cost of the Wi-Fi hotspots themselves is not if they were received prior to July 1, 2021.

Q: Can applicants lease connected devices?

A: Yes, connected devices may be leased, but the cost of the leased devices must be reasonable. USAC will carefully review requests for leased devices to ensure the costs are reasonable compared to the \$400 limit for purchasing a connected device.

Q: Commercially available fixed or mobile broadband internet access services are eligible for ECF support. Does that mean that the services purchased must also be available to the general public?

A: No. To be eligible for ECF support, commercially available broadband services must be available for purchase, but they do not have to be available to the general public. For example, services purchased through bulk purchasing arrangements are eligible.

Q: Where there is no commercially available internet access service option, what must an applicant do to seek support for construction of broadband networks?

A: Only where there is no commercially available internet access service option, applicants may seek support for construction of broadband networks. For network construction, applicants seeking support must:

1. provide clear evidence demonstrating how they determined that an existing fixed or mobile broadband network was or is not available including by seeking service from existing service providers serving the area prior to constructing the network;
2. define the geographic area that will be served and assess the estimated number of students and school staff, or library patrons to be served;
3. certify that they sought such service and providers were unable or unwilling to provide services sufficient to meet the remote learning needs of their students, school staff, or library patrons; and
4. show the construction is completed and services provided within one year of a funding commitment decision.

Q: Who owns the equipment purchased with ECF support?

A: Schools and libraries, as the applicants, will own the equipment purchased with ECF support.

Eligible Locations

Q: If a school reopens, and students and school staff are attending school in person, is off-campus equipment or service for that student or teacher still eligible for ECF support?

A: Yes. Such equipment and services are eligible if needed to meet the remote learning needs of students, such as homework, or school staff who would otherwise lack sufficient access to connected devices and/or a broadband internet access connection while off campus.

Q: In the event that students are attending school in person, can they bring their connected device on campus?

A: The rules only prohibit schools and libraries from requesting and receiving support for eligible equipment and services purchased for use solely at the school or library, and thus provide flexibility for some on-campus use as long as the eligible equipment and services were purchased primarily to provide off-campus access. Note: Fixed wireless and wireline connections purchased with funding from the ECF may not, however, be similarly used on-campus given that these connections are already eligible for funding under the E-Rate Program.

Q: Can schools use ECF support for internet service on buses that transport students to and from school?

A: Yes. Schools may use ECF support for internet service on buses that transport students, whether they are in transit or parked.

Eligible Uses

Q: Which school staff are eligible to receive equipment and services eligible for ECF support?

A: School staff that provide educational services to students, such as teachers and para-professionals that work with students in the classroom, including the virtual classroom, are eligible to receive ECF-funded equipment and services.

Q: For parked school buses or other multi-user locations, are other members of the community, besides students and school staff, permitted to use the internet access?

A: No, other members of the community are not permitted to use the services. Internet access must be primarily used for educational purposes and is limited to intended users.

Q: If a district-owned connected device was assigned to a student, but the device is no longer sufficient to engage in remote learning (for example, a three-year old laptop), can the district request ECF support for a new connected device?

A: Yes. If a device is no longer sufficient for a student to engage in remote learning, ECF support can be used to provide a new device. Applicants must certify on their funding application that they are only seeking support “for eligible equipment and/or services provided to students and school staff who would otherwise lack connected devices and/or broadband services sufficient to engage in remote learning.”

Q: Can an applicant request funding for connected devices or Wi-Fi hotspots for all of its students as part of a 1:1 device initiative?

A: No. Applicants must certify, as part of their funding application, that they are only seeking support for eligible equipment and services provided to students and school staff who would otherwise lack access to connected devices or broadband services.

Reasonable Support Amounts

Q: What Are the Reasonable Support Amounts for Eligible Equipment?

- The program will reimburse applicants a maximum of \$400 for each laptop or tablet, and a maximum of \$250 for Wi-Fi hotspots.
- For other eligible equipment and services, the FCC and USAC will review costs to ensure they are reasonable.

Q: Can a school or library purchase connected devices that cost more than \$400?

A: Yes, schools and libraries may buy more expensive laptops, tablets, or Wi-Fi-hotspots, but they can only be reimbursed up to \$400 for each laptop or tablet and up to \$250 for Wi-Fi Hotspots.

Q: Is the \$250 limit on Wi-Fi hotspots for hardware and monthly services, or just hardware?

A: The \$250 limit is a cap on the hardware cost for a Wi-Fi hotspot provided to a student, school staff, or a library patron. The monthly cost of services must also be reasonable, but is not included in the \$250.

Q: Are monthly services costs limited to \$25 per month?

A: No. The Order states that services would generally be in the range of \$10 to \$25 per month, but it did not set a maximum support amount in the way that it did for connected devices or Wi-Fi hotspots. USAC will review monthly service costs to ensure that they are reasonable. Applicants should be prepared to justify the service selection process they used and reasonableness of costs, if requested, during the review process.

Q: Can a tablet or laptop that can serve as a connected device and a Wi-Fi hotspot collect both \$400 and \$250 per device?

A: No, a school or library cannot receive additional funding for a tablet or laptop that can serve as both connected device and a hotspot. It is a connected device subject to the \$400 cap.

Q: Are Wi-Fi hotspots designed for many users, such as on a bus (e.g. 100+ users), limited to \$250?

A: No, the \$250 limit is a cap on the hardware cost for a Wi-Fi hotspot provided to an individual student, school staff, or a library patron. As with other eligible equipment and services, however, costs must be reasonable. Applicants should explain in their funding request narratives how the multi-user Wi-Fi hotspot is being used or provide an explanation for the higher cost and why the equipment was selected.

Unmet Needs

Q: How should applicants determine their unmet needs?

A: The FCC has not prescribed a specific way for applicants to go about estimating what they will need to address unmet needs.

In the case of schools, applicants should provide their best estimates about the number of students who did not have access to adequate connected devices, broadband connections, or both when the pandemic began; the number of students who do not currently have adequate access; and how the applicant expects those numbers to change with the requested ECF Program support.

While the FCC has not dictated specific data collection requirements for estimating the unmet for students, schools must describe how and when they collected the information that they use for the estimates provided in their responses.

There is no such data collection requirement for libraries to estimate the unmet need for library patrons. However, both schools and libraries must certify that they are seeking support for eligible equipment and/or services for students, school staff, and/or library patrons that would otherwise lack adequate access.

We encourage applicants to make their best efforts to estimate what they will need and apply for ECF funding in a timely manner, just as they do for the E-Rate Program.

Applicants may seek funding for only one fixed broadband connection per location and only one connected device and/or Wi-Fi hotspot per student, school staff member or library patron.

Application Process

Q: Do applicants need to have contracts in advance of submitting an application for ECF support?

A: No, contracts are not required under the ECF Program rules, but applicants are required to comply with state, local, or Tribal procurement laws or regulations.

Q: Can applicants change their service providers after they file their applications?

A: Yes, applicants may change service providers.

Invoice Process

Q: Do approved applicants that receive recurring monthly services need to submit invoices within 60 days of each monthly invoice?

A: No. For recurring services that are invoiced on a monthly or periodic basis, approved applicants may invoice within 60 days of the last date of service (i.e., they must invoice at least once by August 30, 2022 for services received through June 30, 2022).

Q: Can applicants pre-pay for a year of services and seek reimbursement as soon as they have a funding commitment?

A: No. Approved applicants cannot invoice for services that have not yet been received.

Children's Internet Protection Act (CIPA)

Q: Do the Children's Internet Protection Act (CIPA) requirements apply for all equipment that is eligible for ECF support?

A: No. CIPA requirements only apply to school- or library-owned computers (e.g., tablet computers and laptop computers), and only when the school or library receives ECF or E-Rate support for internet access or internet services, or E-Rate support for internal connections. For example, CIPA requirements do not apply to the purchase of Wi-Fi hotspot devices.

Q: Do CIPA requirements apply to school- or library-owned connected devices if the school or library does not also receive ECF or E-Rate support for internet access or internet services, or E-Rate support for internal connections?

A: CIPA does not apply to the use of computers owned by a school or library, including those laptop computers or tablet computers purchased with ECF support, if the purchasing entity does not also receive ECF or E-Rate discounted internet access or internet services, or E-Rate discounted internal connections—or network equipment for internet access, internet service, or internal connections.

Q: Do CIPA requirements apply to a student-, school staff-, or library patron-owned computer if it uses an ECF-funded broadband connection?

A: No. CIPA does not apply to the use of third-party owned devices, even if the school or library receives ECF support for the broadband connection.

Duplicative Funding

Q: Can an applicant receive ECF funding for a broadband connection to the home for a student that previously received support for that connection from another government program (such as CARES Act funding) that is no longer available?

A: ECF rules do not permit applicants to receive duplicative support for the portion of the services that have already been reimbursed through other federal or state programs. If a student's household is receiving support from, for example, the Emergency Broadband Benefit (EBB) Program for broadband internet access connectivity, the student would not be eligible for broadband connectivity under the ECF Program.

If the previous program funding is no longer available, and the student as a result lacks adequate access, the applicant may seek funding for providing broadband connectivity to that student.

Additionally, a student whose household is receiving broadband service through the EBB Program could receive a connected device through the ECF Program if they would otherwise lack such access.
